Part B: Group Project
Transport

Group Meeting Week 6

1st March, 2004

Scribe
Leanne

Attendees
Hee Dong, Roy, Derek, Ayman, Leanne

Discussion topics
Group progress

Conclusions

1.	Prof. Clark has stated that it is vital we finish all our reviewing and analysis soon.
2.	Our next Crit must contain what WE have done
3.	We should be deciding what ITS we are going to use by the beginning of next week.
4.	**Leanne** has distributed an electronic copy of the questionnaire
5.	We need more responses to our questionnaire we will try again this week
6.	Traffic count was successful in identify congestion hot spots

Actions to be completed for next meeting - Mon 8th at 15:00

Person Responsible	*Task*
Team	More questionnaires from different areas - charing cross possibly woodlands road parking area, St.Enoch car parks, renfrew street NCP.
Team	More car counts to justify our choice of area - high street, charing cross, St.Enoch, George square, in and around city. Times of these must be varied.
Team	Decide what is the most important ITS criteria so we can compare different systems using a weighted matrix. From here we can construct our hybrid or "new" technology piece of ITS.
Leanne & team	Carry out test runs of petrol consumption and time spent in congestion
Leanne	Conduct a comparative analysis of the questionnaires
Roy, Ayman & Hee Dong	Identify the problems that have been faced when implementing ITS and how they where over come in other places e.g. European cities, Korea
Derek & team	Gather some transport stats. for our target area
